EXCLUSIVE NEW BENEFIT

for Physician & Health Practitioner
Members of The American Academy
of Anti-Aging Medicine (A4M)

Top experts provide affordable and accessible legal counsel

The A4M Medical Legal Defense Program (MLDP)

ONE OF THE MOST CHALLENGING and disrupting issues for a physician is to have his/her license threatened by state medical boards sanctions and censorship. Often, such boards act on the advice of “anonymous complaints” and are lodged in the absence of any proven significant adverse events relating to innovative new therapies. Recently, The American Academy of Anti-Aging Medicine (A4M; www.worldhealth.net) and other medical/health organizations have observed what appears to be a deliberate effort on the part of many medical boards to prevent physicians from implementing and even advocating apparently safe and beneficial new technologies by claiming that such applications are outside the scope of accepted medical standard. Regrettably, the history of healthcare is replete with examples of good and caring doctors subjected to improper sanctions.

DEFENDING MEDICAL INNOVATION

Since its inception in 1992, the A4M has sought to support its member physicians and to provide valuable resources to promote the legal defense of innovative physicians who practice sound, reliable, and responsible medicine. The A4M is proud of its demonstrated record in assisting dozens of physicians in protecting their professional reputations against baseless harassment. We have provided expert testimony, extensive scientific literature reviews, and legal advisors,

Your medical license and economic well-being may depend on access to expert medical legal counsel.

backed by the socio-political strength of an international medical society now 22,000 members strong. The A4M’s well credentialed physicians continue to practice the new Gold Standard of advanced preventative medicine, namely anti-aging and regenerative medicine.

In our continuing efforts to serve our members, A4M is pleased

In the event that a medical practitioner is facing review by a medical review board or similar organization, the MLDP will immediately review your case, recommend initial action and refer your case to a qualified attorney within our program.

to announce the formation of the A4M Medical Legal Defense Program (MLDP). The MLDP has assembled a team of leading medical and legal experts to create a program designed to be a critical resource to A4M members. In the event that a medical practitioner is facing review by a medical review board or similar organization, the MLDP will immediately review your case, recommend initial action and refer your case to a qualified attorney within our program. In addition, medical practitioners can educate themselves on the latest significant activities of medical review boards in their respective states or across the nation by having access to MLDP’s databases of cases and other related resources designed to identify and mitigate risk for physician or medically-based practice groups.

Over the past 17 years, A4M has been on the forefront in introducing and advocating the dissemination of innovative and progressive medical advances such as those involving stem cell and other gene or hormone therapies. The MLDP acts to protect the integrity and professional standing of A4M through considered examination of medical and legal concerns raised both within and outside the A4M community and taking remedial action when necessary.
